Tecnolegno ha ideato numerose soluzioni di finestre legno-alluminio che garantiscono un eccellente connubio fra l'estetica e la naturalezza del legno nel lato interno e la resistenza e durevolezza dell'alluminio nel lato esterno. I rivestimenti esterni sono realizzati con profili di alluminio verniciato con polveri epossidiche. È possibile scegliere fra colori RAL e finiture effetto legno.

68 L-A

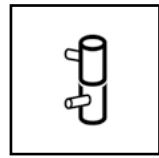

telaio:  
76 x 70 mm

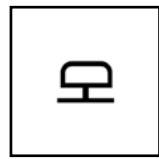

anta:  
80 x 81 mm

vetrocamera:  
fino a 51 mm

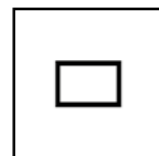

cerniere:  
AGB tipo anta a ribalta

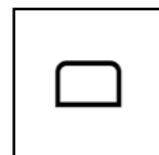

guarnizioni:  
doppia

profili:

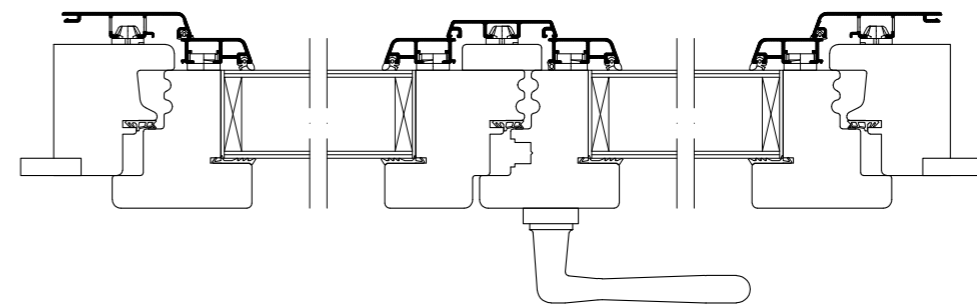

classic

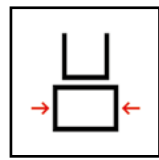

round

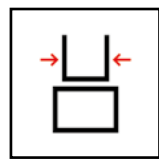

Finestra che combina le elevate prestazioni termiche e acustiche alla praticità dell'alluminio all'esterno.

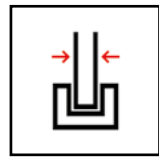

80 L-A

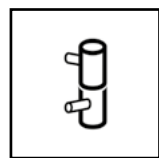

telaio:  
74 x 80 mm  
80 x 80 mm

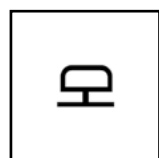

anta:  
68 x 70 mm

vetrocamera:  
fino a 49 mm

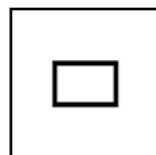

cerniere:  
AGB tipo anta a ribalta

guarnizioni:  
doppia

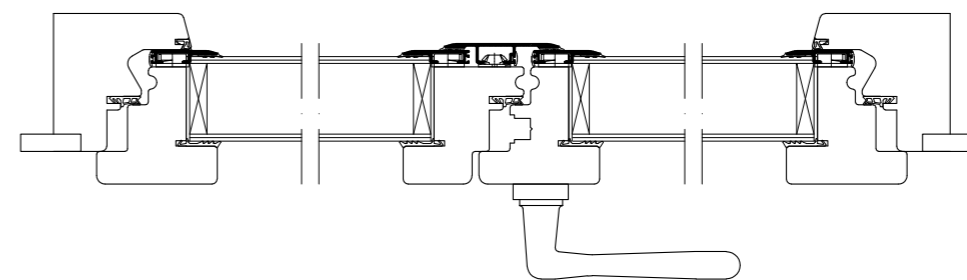

profili:

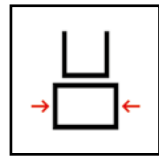

classic

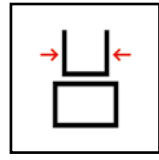

Sistema legno-alluminio moderno che si integra perfettamente con l'involucro edilizio, telaio e anta quasi scompaiono esternamente, la superficie vetrata aumenta e migliora la luminosità degli ambienti interni.

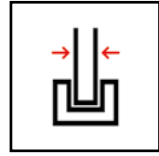

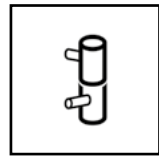

telaio:  
68 x 60 mm

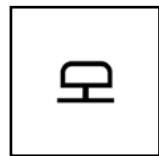

anta:  
68 x 60 mm

vetrocamera:  
fino a 45 mm

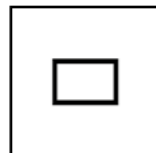

cerniere:  
AGB tipo invisibili

guarnizioni:  
doppia

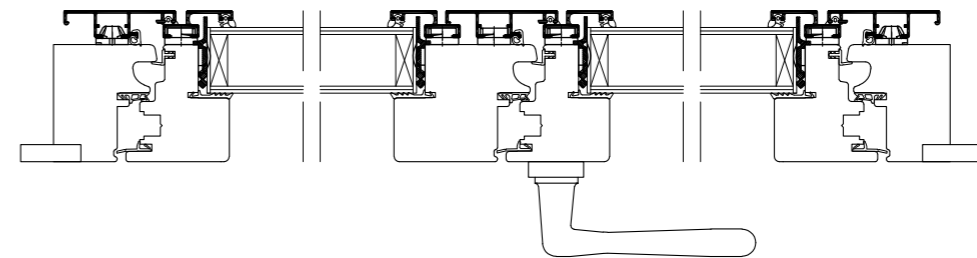

profili:

classic

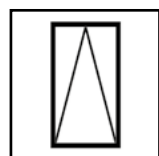

Finestra moderna pensata per coloro che amano lo stile pulito e minimale. L'utilizzo di cerniere a scomparsa rende l'anta a filo del telaio, mentre il profilo da 60 mm aumenta la superficie vetrata rendendo gli ambienti più luminosi.
